

Extempprep.org Ranking Tables

The extemp rankings for Extempprep.org have been a interest to various competitors since their initial creation. While not a comprehensive ranking of tournaments the tournament point tables below provide an explanation of how the rankings are calculated.

The rankings are based upon a competitor's top 5 finishes as indicated by the number of points that the tournament earned them towards their ranking. Therefore a competitor who goes to 10 tournaments will not necessarily have an advantage over the person that only went to 5 tournaments. In addition, in the case of a tie in ranking points the individual with the least number of tournaments is ranked higher.

Non-TOC tournaments

CSU Long Beach in Long Beach California

Included because Long Beach's open extemp draw has historically been approximately 12 panels give or take a few except in years in which this tournament conflicts with the October SAT testing session. Since James Logan High School has gone to this tournament in recent history this tournament is in the same approximate category of competition as CSU Fullerton despite the lack of a TOC bid. This tournament's exclusion in the Extemp TOC qualifying list may be an oversight or perhaps just an acknowledgment of the weaker draw this tournament suffers from periodically when the SAT and this tournament conflict.

Montgomery Bell Round Robin

This invitation only tournament is included for the level of the competition ensures that the winner is not simply lucky at avoided tougher competitors, but rather beating the best of the best. Controversy over invites aside this tournaments inclusion seem obvious.
